

NANDANA H N

nhn3804@gmail.com | +91 7619391830 | linkedin.com/in/nandanhn0 | nandanhn.tech | Bengaluru, India

PROFESSIONAL SUMMARY

Motivated Computer Science & Engineering graduate (2026) with hands-on experience in Python, SQL, and cloud technologies. Demonstrated ability to work on data pipelines, automated testing workflows, and web application development through internships and research projects. Strong analytical, problem-solving, and collaboration skills with exposure to Agile development practices. Eager to apply engineering fundamentals, continuously learn new technologies, and contribute to developing scalable, data-driven, and high-quality software solutions in a dynamic organization.

EDUCATION

Bachelor of Engineering — Computer Science & Engineering.

Dec 2023 – July 2026

New Horizon College of Engineering, Bengaluru | CGPA: 8.00

TECHNICAL SKILLS

Languages: Python, SQL, HTML, CSS

Frameworks: Flask

Databases: MySQL, MongoDB

Tools: AWS (Cloud Practitioner), GitHub, VS Code, Figma, RPA (Automation Anywhere)

Concepts: Data Engineering Fundamentals, DBMS, Computer Networks, Agile Methodology

EXPERIENCE

Data Engineering Intern | Kodnest Technologies Pvt. Ltd.

Feb 2026 – May 2026

- Assisted in building and maintaining ETL/data processing pipelines using Python and SQL to clean, validate, and transform datasets for analysis.
- Designed and optimized SQL queries for data extraction, transformation, and reporting, improving data accuracy and retrieval efficiency.
- Collaborated with cross-functional teams to troubleshoot data quality issues, automate repetitive tasks, and ensure reliable data workflows while following Agile development practices.

Technical Support Intern | Freedom.

Oct 2022 – Jan 2023

- Provided application and system-level troubleshooting support, ensuring timely issue resolution and improved user satisfaction in a fast-paced environment.
- Documented recurring issues and resolutions, streamlining support processes and reducing escalation rates.
- Analysed problems and suggested process improvements, contributing to smoother operations and stakeholder satisfaction.

PROJECTS

Smart Agriculture System — IoT, Arduino, ESP8266, Python — IEEE Published (RTET 2025)

- Designed an IoT-based greenhouse monitoring system tracking soil moisture, temperature, and humidity in real time — demonstrating data collection, processing, and delivery across hardware and software layers.
- Identified and resolved system-level issues during development and testing phases; published at IEEE RTET 2025.

Exam Preparation Web Application — Python, Flask, MySQL, HTML/CSS

- Built a scalable Flask-based web application integrating a structured MySQL database for efficient academic resource storage and retrieval.
- Implemented optimized search using data structures to improve query performance — a pattern directly applicable to data pipeline and delivery optimizations.

Touring Application — Google Maps API, Cloud, Authentication

- Integrated Google Maps API for real-time navigation; validated location accuracy, authentication flows, and data synchronization under varied network conditions.
- Diagnosed and resolved complex API integration issues, improving overall system reliability and cross-platform consistency.

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certification — Cloud Foundations & Practitioner Concepts
- IBM Skills Build & NPTEL Certifications
- Campus Ambassador — E-Cell, IIT Bombay
- IEEE Research Publication — Smart Agriculture System, RTET 2025
